- Heroku
- Gatsby.js
- AJAX

Languages

English, Russian, Kazakh

I'm a student at Seneca College and I have one semester left before graduation, which will take place in May 2021. I yet don't have real-world experience to stand out other candidates but I assure you If you will consider my candidacy I will be a hardworking and enthusiastic employee. After finishing university and receiving a Bachelors's degree in Geology I decided to drastically change my career and this decision led me to software development. I do really enjoy programming and learn with pleasure. I believe that your job has to give joy to your life and I've become very passionate about software development. Although there is still a lot to learn I would like to especially master Java, GraphQL, and AWS in the near future.

Projects

Sneaker Store
E-commerce Business to Consumer (B2C) project. Allows consumers to buy their favorite shoes by using the PayPal payment system.
- *Technologies: MERN stack.*
